

BENEFITS OF WINDOWS AND DOORS MADE FROM ACCOYA® WOOD

WHAT IS ACCOYA?

Accoya® is the world's leading high technology wood. It utilises sustainably grown timber that has been modified at the molecular level by a process called acetylation. Nothing is added to the wood that is not already naturally present. The process prevents wood from bonding with water, and has many resultant durability, stability and other benefits.

DURABILITY CLASS 1

Accoya will last considerably longer than other joinery hardwoods such as sapele and oak

OUTSTANDING DURABILITY

Accoya comes with a 50 year warranty against rot and decay above ground

IDEAL FOR COATING

Factory applied coatings will last much longer on Accoya resulting in pristine looking products and reduced maintenance costs

DIMENSIONALLY STABLE

Products made from Accoya are much less likely to distort, significantly reducing the risk of jamming and ensuring smooth operation for many years

NATURALLY INSULATING

Accoya is a 40% better insulator than hardwoods; so an Accoya window or door will save considerably more energy

FROM SUSTAINABLE SOURCES

All Accoya wood is FSC® certified.

NON TOXIC AND RECYCLABLE

Accoya, continues to win many sustainability awards around the world for its environmental credentials

LIFETIME COSTS

The lifetime costs of Accoya products are significantly less than those made from other wood species due to its improved durability and coatings performance
